SUMMARY

Master of Information Systems student at the University of Melbourne, currently interning as a junior IT solutions and cyber security engineer at Aakonsult Pty Ltd. Resolve client support cases across Microsoft 365, Exchange Online and Windows Server, and help manage firewalls, anti-spam filtering. Also contributed to a PCI DSS compliance monitoring project. Previously handled 2,000+ tickets a month at LTIMindtree and tested web apps at Disney Star. Seeking part-time or casual IT and cyber security roles.

SKILLS

IT & cloud: Microsoft 365, Exchange Online, Windows Server, Azure, AWS, firewalls, anti-spam filtering, backup and disaster recovery, networking (switching, routing, subnetting), Cloudflare (Workers, WAF)

Tools & scripting: PowerShell, Linux, ServiceNow, Jira, Draw.io, Python, TypeScript, JavaScript, SQL

Security & compliance: PCI DSS v4.0, vulnerability assessment, web application penetration testing, static code analysis, dependency scanning, audit logging

Security tools: Burp Suite, Fortify, Snyk, Wireshark, Autopsy, Aura Inspector

EXPERIENCE

Junior Cyber Security Engineer / Junior IT Solutions Engineer Intern **Jul 2026 – Oct 2026**
Aakonsult Pty Ltd, Melbourne, VIC

- Resolved client IT support cases across Microsoft 365, Exchange Online and Windows Server environments.
- Administered Exchange Online and Microsoft 365 through PowerShell, including bulk mailbox archive setup, and troubleshot connectivity issues on Linux systems.
- Supported client environments with firewall management, anti-spam filtering, backup and disaster recovery configuration.
- Contributed to a PCI DSS v4.0 compliance project, building a payment page tamper-detection tool (TypeScript, Cloudflare Workers) that now runs weekly on a nonprofit client's live donation pages.

Application Security Testing & Vulnerability Assessment Intern **Jun 2024 – Oct 2024**
Disney Star (The Walt Disney Company), Mumbai, India

- Carried out 15+ vulnerability assessments and penetration tests on internal web and software applications, finding critical security flaws and contributing to a 40% reduction in exploitable vulnerabilities.
- Used Burp Suite, Fortify and Snyk to find injection flaws, misconfigurations and insecure dependencies.
- Prioritised critical findings and tracked remediation with development teams in Jira and Microsoft Teams.

Service & Quality Assurance Intern **Jan 2023 – Apr 2023**
LTIMindtree (Larsen & Toubro Infotech Mindtree), Remote

- Categorised and prioritised 2,000+ service tickets a month across several client accounts, helping cut average resolution time by 25% and improve SLA adherence.
- Supported IT troubleshooting for client accounts alongside ticket management, using Microsoft 365 tools.

PROJECTS

- **CAN Bus Security Analysis:** Simulated a vehicle Controller Area Network (CAN) bus, demonstrated DoS and replay attacks, and built tools to monitor and manipulate CAN traffic.
- **Custom Android ROM Development:** Compiled Android ROMs from AOSP source on Linux, including build environment setup, kernel configuration and fixing build errors.
- **LawGIC-AI:** An AI tool that answers legal questions from India's 2023 criminal law codes, citing sections.

EDUCATION

Master of Information Systems **Mar 2026 – Dec 2027 (expected)**
University of Melbourne, Melbourne, VIC

B.Tech in Computer Engineering (Degree + Diploma) **Jul 2019 – Jun 2025**
NMIMS Mukesh Patel School of Technology Management & Engineering, Mumbai, India | CGPA 3.47/4
